THE EXISTING KITCHEN

Listing photo · Range wall

This 1937 Cape has a compact galley, a sink under the window and a dark wood floor worth keeping. Start with the cabinet fronts and lighting. Keep the quartz if it is sound and can stay in place.

AI kitchen concept

Cotton & brass

Keep the quartz and subway tile. Warm the painted fronts with aged brass cup pulls and swap the ceiling fixture for opal glass.

AI kitchen concept

Oak & soft clay

Natural oak on the low run picks up the tones in the floor. Soft clay uppers keep the aisle light, with satin nickel against a pale backsplash.

AI kitchen concept

Olive & bronze

Olive fronts give the galley more depth. Pair them with muted bronze hardware and pale tile, keeping the counter light along both sides.

Framed panel

Compare the frame proportions against the existing narrow runs.

Exact style numbers appear in both catalogs. Confirm current availability, finish compatibility and whether existing boxes can be reused.

LIGHTING

Use a shallow flush mount to keep the ceiling visually open.

HARDWARE

Compare the pull projection along the narrow aisle.

BACKSPLASH

Keep the existing subway tile in the lightest scope.

SINK & FAUCET

Keep the sink position and check window and handle clearance.
