COMPANY FEATURED IN THIS SAMPLE

Bath Quality Team

New England

Kitchly sample based on public information from Bath Quality Team.

MANUFACTURER REFERENCES

DELTA MOEN KOHLER

Product examples from published sources. Confirm options with the contractor.

THE EXISTING BATHROOM

Listing photo · Primary view

The compact bath has a window over the vanity area, a tub curtain, and a visible wood surround. The study stays within the existing room and fixture locations.

Listing photo · Alternate view

AI bathroom concept

A lighter bath

Warm white walls and a light oak vanity make the most of the existing daylight. The sink stays in place.

AI bathroom concept

The vanity

Start with the cabinet faces. Check that the cabinet can be refinished and that the vanity top is sound before replacing either.

The vanity · Concept detail

AI bathroom concept

At the window

Keep the window, trim, and mirror. Sample the wall finish in the actual light and check the existing ventilation.

AI concept detail

A LIGHTER BATH

Warm white walls and a light oak vanity make the most of the existing daylight. The sink stays in place.

Same room · One finish study

THE VANITY

Start with the cabinet faces. Check that the cabinet can be refinished and that the vanity top is sound before replacing either.

Same room · One finish study

AI concept detail

AT THE WINDOW

Keep the window, trim, and mirror. Sample the wall finish in the actual light and check the existing ventilation.

Same room · One finish study

Concept crops illustrate the color direction. Verify with physical samples.

SURFACE CHOICES

AI concept detail

WARM WALL COLOR

Test the color in daylight and at night. Confirm the wall substrate and moisture exposure first.

Color study

NATURAL WOOD TONE

Compare a physical sample against the existing trim before choosing paint, stain, or a new finish.

Color study

AI concept detail

The photographs show concept details. Review manufacturer samples to compare patterns and finishes.

Kohler

Bath collection

Bath and faucet examples

Explore the collection. Check product dimensions and compatibility before selection.

Images are details of the room concept. The catalog links to the published product references.

VANITY DEPTH

Confirm usable space in front of the vanity.

MIRROR AND LIGHT

Check the fixture height and wiring before changing the light.

WINDOW TRIM

Inspect for moisture at the sill and casing.

TUB SURROUND

Check seals and the condition behind the visible finishes.

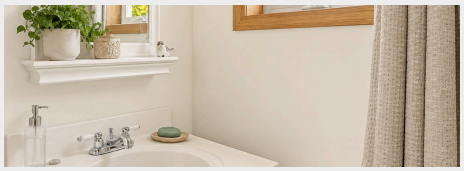

AI concept details

What to budget for

Use this plan to decide what needs a quote and what to verify in the room.

A lighter bath

The vanity

At the window

Decide what stays

A sound tub, vanity and rough plumbing can keep the scope focused.

Price the hidden work

Include ventilation, water damage, valves and any electrical changes in separate allowances.

Measure before ordering

Confirm vanity depth, sink cutout, faucet spacing, and tub dimensions on site.

A design study for discussing scope. Pricing and fit require an on-site assessment.
