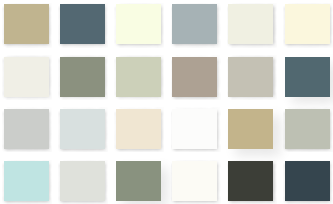
MODERN CLASSICS

A palette that addresses the growing trends of grey-based colors, dark rich browns, mid-tone browns and the movement to lighter wood finishes, giving the clarity and substance of fine furniture, page 4-10



FABULOUS PAINTS

The paint color palette is nature inspired with colors that are clear, livable, elegant and durable, making them the hallmark of our beautiful finishes, page 11

COMPLEX EXPRESSIONS

Designed for an entire kitchen or an accent piece as a focal point. These finishes allow a dimension of artistic styling that bring a sense of individuality and personalization, page 12-13

ADDITIONAL FINISH PRODUCTS AND ENHANCEMENTS

CUSTOM PAINT MATCH

Match a solid finish from well-known paint manufacturers, such as Sherwin-Williams, Ralph Lauren, Benjamin Moore, Behr and more, page 14

GLAZE OPTIONS AND TECHNIQUES

Highlight finishes with one of our four (4) glazes and our two (2) techniques of application, either a hand-wiped or a hand-brushed option, page 15

AGING TECHNIQUES

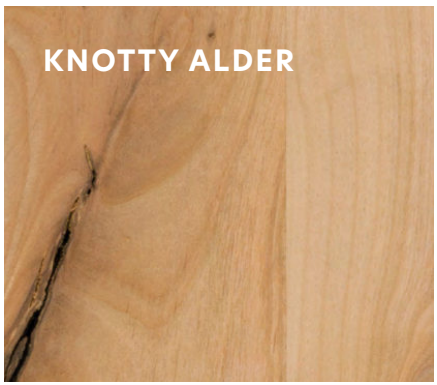
Handmade artistic processes to accentuate finishes even more. Add character to any finish with one of our ten (10) available distressing options, page 16

SHEEN OPTIONS

The best known finishes in the industry are offered in two (2) sheen options for a subtle variation in reflection, creating not only protection but the velvety feel of an elegant and durable finish, page 17

MODERN CLASSICS

Reddish-brown to pale yellow wood with soft straight grain, even texture and a subtle figure. Alder mellows with age and exposure to light.



Random distribution of knots which will be partially filled with resin as a means of securing the knot.

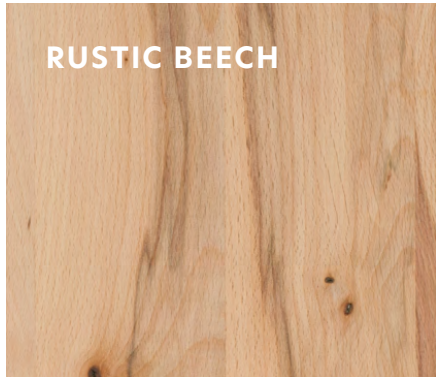
BEECH

Strong wood with whitish to pale brown straight grain and small grey flecks. Although we hand select our lumber, you can expect some light mineral color and streaking which will be more noticeable on light finishes.

RUSTIC BEECH



Repaired knots of various sizes and heavy mineral coloring and streaking, which is more visible on lighter finishes.

Durable, moderately strong hardwood with reddish-brown hue, straight grain and fine texture. Although we hand select our lumber, you can expect some slight mineral streaks, gum or pitch pockets and a small percentage of white sapwood. These characteristics are more noticeable on lighter finishes. Cherry wood darkens over time and exposure to light.

ARABICA

OBSIDIAN

A dense, tough, coarse-textured wood with white sapwood and reddish-brown heartwood. The color and graining patterns will have variations from black to brown in the heartwood to yellow in the sapwood. Certain stains will amplify this effect.

MODERN CLASSICS

MAPLE

Heavy, straight-grained wood with a fine texture. The sapwood is white and selected for its light color; maple does not generally take dark colors well and may appear blotchy. On light colors the natural mineral streaks may not be concealed. Darker colors often conceal these mineral streaks.

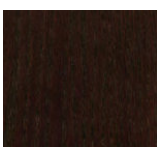
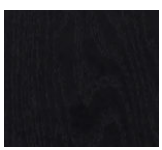
BERWICK



ARABICA



OBSIDIAN

Timeless hardwood with a coarse texture and a pinkish-red hue. The texture of the wood varies according to the rate of growth, but typically has a strong open grain pattern with a mix of straight and cathedral grain patterns. Although we hand select our lumber, you can expect small amounts of mineral streaking, pin knots and burls as well as occasional ray flakes.

Stable wood with pale yellow-brown to pale brown tones, sometimes with a pinkish tint. As a result of the quarter sawing process, the wood exhibits a beautiful grain texture with a uniform straight grain and a striking ray flake figure. Although we hand select our lumber, you can expect occasional pin knots and light mineral streaks.

GLAZE TECHNIQUES

STANDARD GLAZE. Highlighting is applied to the entire surface of the cabinet and doors and then wiped off, leaving hang-up in the recessed areas.

BRUSHED GLAZE is a special technique that leaves brush strokes over the entire surface.

NO GLAZE

NO GLAZE

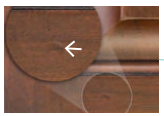
AGING TECHNIQUES

CRACKS
Simulated cracks of varied lengths and sizes

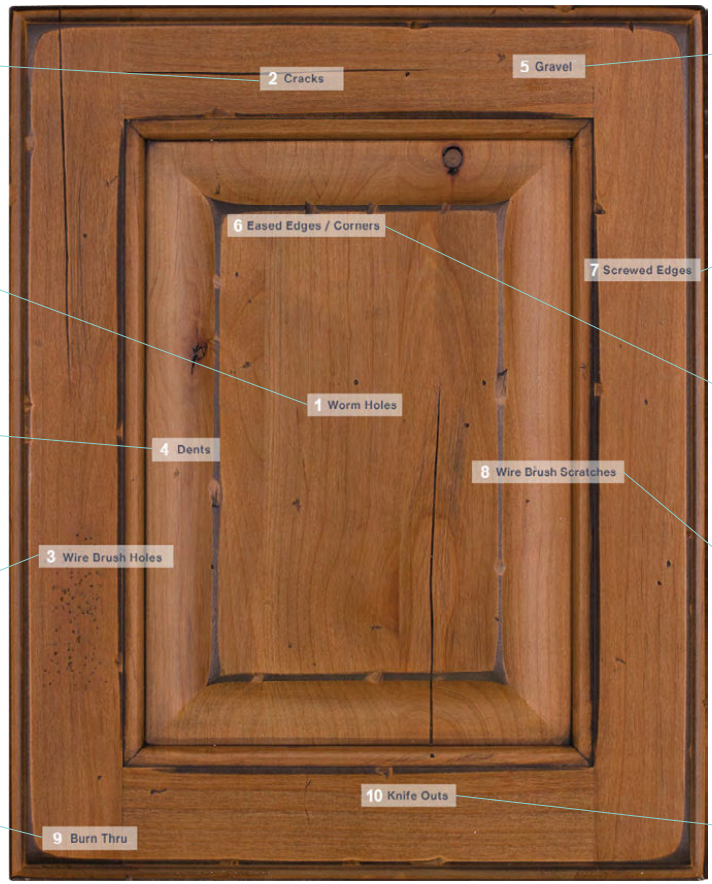
WORM HOLES
Random ice-pick marks in small clusters throughout



DENTS
Random placement of shallow dents

WIRE BRUSH HOLES
Very small lightly patterned holes in different areas of a door

BURN THRU
Wear through, after stain is applied, before glaze/sheen



Ten (10) types of aging (distressing) techniques are available in a variety of combinations. Aging is a handmade artistic process and, like any fine art, no two pieces will be identical. Not all types of aging are available on all wood species.

GRAVEL
Random dents of various sizes, deeper, more widespread

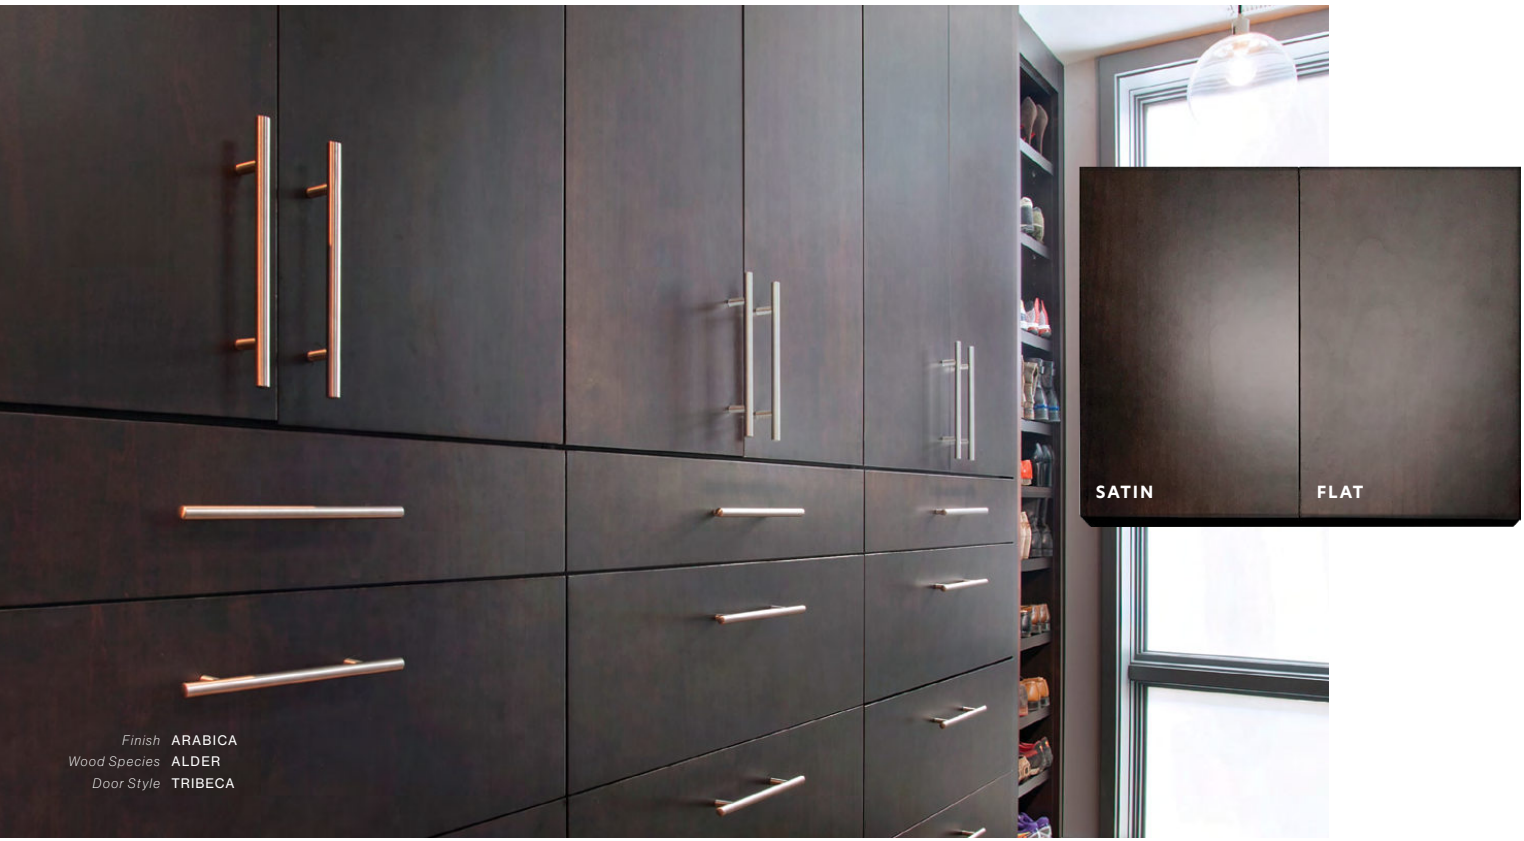
SCREWED EDGES
Simulated saw marks on edges of the door

EASED EDGES/CORNERS
All corners are sanded before stain is applied to create a worn edge

WIRE BRUSH SCRATCHES
Tiny scratches in a tight pattern

KNIFE OUTS
Tear outs along the edges of the door

SHEEN OPTIONS



Two sheen options are available, Satin and Flat. Our Satin sheen has a slight reflective finish, and our Flat sheen is a less reflective finish. Both options provide a velvety feel that's elegant while being durable and easy to clean, for one of the best quality finishes in the industry.

CAMBRIA®

Find your inspiration

NATURAL STONE SURFACES || PALETTE

THE MARK OF THE LEGEND

As the industry leader, Cambria® combines only the purest natural quartz, unmatched American craftsmanship, family-owned values, and a steadfast dedication to quality to create exceptional natural stone surfaces our customers can own with pride and confidence. Only when our surfaces are perfect will they display the Cambria medallion – our mark of absolute quality.

FAMILYOWNED AMERICANMADE

FLAWLESS performance

Cambria® uses the purest natural quartz to create stunning designs with exceptional depth and clarity. Every surface is rigorously inspected at each stage to ensure the highest quality.

- ~ Superior durability for chip and scratch resistance
- ~ Nonporous to keep spills from becoming stains
- ~ Maintenance free for easy-care cleanups with no sealing required
- ~ Full Lifetime Warranty

SUMMERHILL™

PEACE OF MIND for life

FULL LIFETIME WARRANTY

Every Cambria natural stone surface is proudly backed by a Full Lifetime Warranty. No other quartz manufacturer offers this kind of guarantee. We also provide first-class service throughout the life of your countertops.

Should you need us, our Customer Care Representatives in Belle Plaine, Minnesota, are available to help at 1-866-CAMBRIA (1-866-226-2742), or visit CambriaUSA.com.

LUXURY
for living

WHITE CLIFF™

Luxury Series

Representing a modern renaissance in natural stone surfaces, the Luxury Series epitomizes a mastery of traditional processes refined over decades in a way only Cambria® can. Always striving to satisfy the most discerning design sensibilities, Luxury Series designs offer a remarkable melding of form and function for rare beauty unlike anything else in the world.

HOW TO FIND YOUR PERFECT CAMBRIA® DESIGN

Choosing the Cambria design that's right for you and your space is easy. Here are a few things to consider to help you find the ideal combination of color, style, and finish.

1 TONE

Decide if you want your Cambria to complement the existing tones in the room or create a dramatic contrast to the paint and cabinetry.

2 MOVEMENT

Determine if you prefer bold movement or a more subtle design. For a truly personalized effect, try combining a dramatic, show-stopping design with a more muted selection.

3 FINISH

Designs are available in high gloss or Cambria Matte™ finish to expand your design options and opportunities to beautifully enhance your space.

4 SAMPLES

We recommend you order samples of your designs and put them in place to see how they appear in different lighting throughout the day and evening. Order samples through your local Cambria dealer or visit CambriaUSA.com.

5 EDGE

To beautifully complement your Cambria, select one of Cambria's edge profiles to add even more personalized beauty to your surfaces.

Use your smartphone camera to scan the QR code to see slab views of Cambria's entire design palette online.

FAMILYOWNED AMERICANMADE

Cambria's design samples are small selections cut from a slab and do not fully show all design characteristics of a slab or the final installed product. Prior to purchase, view a larger representation of a design at CambriaUSA.com. Variations in natural quartz stone color, pattern, size, shape, and shade are unique and inherent characteristics of Cambria products. Certain designs include natural free-flowing quartz crystals that may result in surface deviations to the touch and appearance. Color blotches are intended to enhance the natural beauty of many of Cambria's designs. These variations and characteristics do not affect performance and do not qualify for product replacement. Cambria products are not seamless when installed; seams are visible and design pattern and shade will change at seams. Surface markings are more visible on monotone colors than multi-colored surfaces. Cambria Matte™ finish will show surface markings caused during normal use, which are easily removed with an all-purpose cleaner such as concentrated Simple Green® cleaner. Cambria is durable and resistant to surface damage. However, all stone can be damaged by force, and no stone is chip- and scratch-proof. Objects hitting Cambria's surface, especially at edges near sinks or dishwashers, may chip the product. Sudden and/or rapid temperature change may damage the product. Direct or sustained heat transfer, for example from pots, pans, and other cooking units such as griddles, slow cookers, and heat lamps, may damage Cambria's surface. Therefore the use of a solid trivet is always recommended. Cambria is not a structural support material and must be supported in every application. To learn more about Cambria, please visit CambriaUSA.com.

CORIAN®
QUARTZ

FEATURES & BENEFITS

With innovative designs and an enduring color palette, Corian® Quartz will make all of your home design aspirations come true. Achieve your dreams while still selecting a quality material that will stand up to whatever your life may throw at it. You can rest easy knowing you've picked a surface to last a lifetime!

DURABLE: The performance properties of Corian® Quartz enable it to resist scratches and minimize short and long-term maintenance.

CAREFREE: Unlike other materials, you never have to seal, polish or recondition the surface to maintain its luster. Corian® Quartz is easily cleaned with soap and water and does not require sealants or waxes.

HEAT RESISTANT: Corian® Quartz is heat resistant, but use of trivets or heat pads is recommended.

NONPOROUS & STAIN RESISTANT: Corian® Quartz is a nonporous surface and resists stains. When properly cleaned, these surfaces do not support the growth of mold, mildew and bacteria.

TRUSTED & SUPPORTED: Corian® Quartz is backed by a 10-year limited product warranty.

STANDARDS COMPLIANCE: Most Corian® Quartz colors are NSF/ANSI Standard 51 Certified for food contact. They are also Class I (Class A) fire rated.

CONTRIBUTES TO SUSTAINABLE DESIGN: In the finished installations, Corian® Quartz and its adhesives are low VOC, nontoxic, and nonallergenic to humans. Corian® Quartz is GREENGUARD Indoor Air Quality Certified®.

Elevate every space

VIATERA, inspired by life's moments and nature, redefines countertops as the canvas where beauty meets utility. More than just a high-quality engineered surface, VIATERA is an artful expression, always balancing lifestyle and utility. Our commitment to outstanding craftsmanship ensures dependability – a promise delivered consistently with precision. Like the enduring inspiration we draw from everyday life, VIATERA surfaces are not only practical but also designed to be lasting, reflecting the practicality and longevity that you desire in every space.

VIATERA Features & Benefits

Strong & Durable
VIATERA contains up to 93% natural quartz while natural stone generally contains 20 to 60% quartz. As a result, VIATERA tends to have higher tensile strength than natural stone.

Hygienic & Non-porous
VIATERA is non-porous and it is safe for food preparation. When a material or a seam is porous, food particle can be trapped in the surface material, becoming a breeding ground for bacteria and contamination.

Stain & Scratch Resistant
Quartz is an impervious crystalline mineral that is particularly resistant to absorption. Because of this characteristic, VIATERA is extremely stain resistant.

Easy Care & Maintenance
Non-porous and easy to clean, VIATERA is ideal for kitchen and bath applications. Unlike other stone products, VIATERA does not require sealing.

QUARTZ: A NATURAL BEAUTY WITH ETERNAL LOOKS

There are countertops, and then there's Q. In a league all on its own, Q Premium Natural Quartz Countertops embodies modern elegance with the perfect mix of natural and manufactured materials for superior style and performance. With over 100 scratch, heat, and stain resistant styles, you can count on Q to retain its good looks even in the busiest of settings.

WHY Q?

Q Premium Natural Quartz is a leading-edge collection of unique and innovative countertop solutions from MSI, an esteemed family-owned multi-surface company and the number one importer of quartz slabs in the United States. With global sourcing capabilities and other state-of-the-art facilities along with U.S.-based manufacturing, MSI can offer solutions for any space and design challenge. With a nationwide reach of over 40 distribution centers across major cities, we make dream surfaces attainable.

LUMALUXE

Q Premium Natural Quartz with LumaLuxe and LumaLuxe Ultra creates today's most beautiful natural quartz countertop. A break-through in quartz engineering, LumaLuxe is an exclusive MSI formulation which enhances how light interacts with your countertop surface, ultimately pushing the boundaries of realism with increased depth, dramatic veining, and more immersive colors.

VARIETY OF ON-TREND COLORS & STYLES

Q Premium Natural Quartz is available in a wide array of marble, natural and modern designs. Beautiful and timeless colors, from warm to cool white, light to dark gray tones, and rich creams and inviting browns, enhance the look of a room no matter the design. Dramatic to subtle veins offer the look of natural marble.

DURABLE

Treated and pressed, natural quartz is one of nature's hardest minerals. Q Quartz offers a 99.9% solid, non-porous surface with superior stain, scorch, scratch, and chip resistance to stand up against the wear and tear of daily life.

LOW MAINTENANCE

Q Premium Natural Quartz requires no sealing, polishing, or reconditioning. The products are easy to care for and maintain, minimizing the need for harsh chemicals. Additionally, the natural, non-porous surface resists stains from coffee, tea, fruit juices, food coloring, and many other surface agents.

MSI's domestic manufacturing plant located in South Carolina utilizes both patented processes and state-of-the-art machinery to produce the whitest and most natural looking quartz in the market.

LUMALUXE ULTRA®

LIGHT • REALISM • DEPTH

Built on the breakthrough LumaLuxe formulation, LumaLuxe Ultra is a proprietary and patented technology exclusively produced by Elite Quartz- MSI's South Carolina manufacturing facility.

WHAT DOES LUMALUXE ADD TO OUR QUARTZ DESIGNS?

In a word: Depth!
We hear time and time again that what makes natural stone Quartzite's desirable as a surface is the translucency and depth of material, LumaLuxe adds depth of color to Quartz material enhancing the beauty and naturalism of veining and background color.

SILESTONE®
eternal
NEW 2018 COLLECTION
A product designed by COSENTINO®

SILESTONE®

Reinventing Eternity

The New Eternal Collection® delivers an interesting addition following the current trend of marble and elegant neutral spaces.

Vibrant tones, reinventions of the classics, are now materialized in golden and elegant grey hues.

Three new proposals with a wide colour range that are born with the aim of giving versatility, luminosity, and personality to both cold and warm spaces.

Discover them all.

ETERNAL CALACATTA GOLD

Silestone Eternal Calacatta Gold

Patterned wiht a blueish and grey vein plus golden shades, it is one of the most desired natural stones in history due to its whiteness.

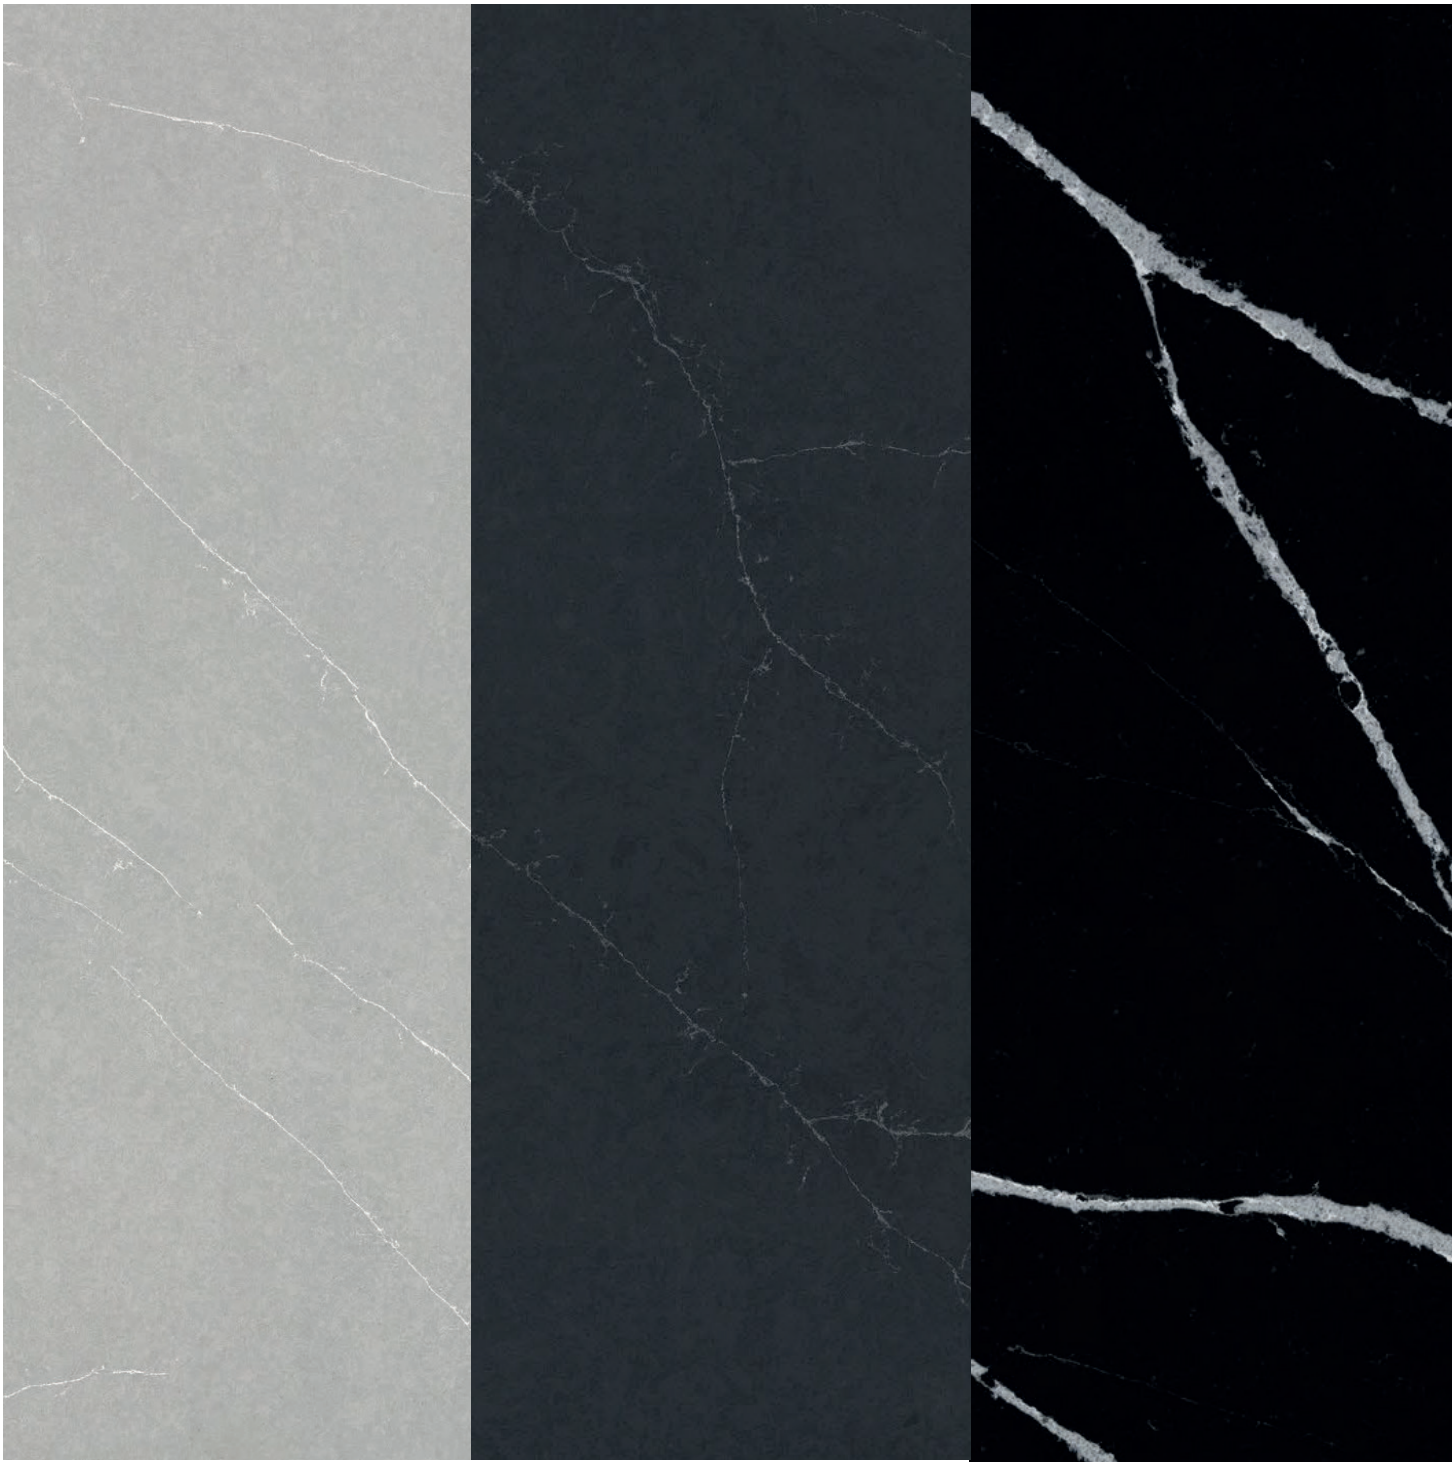
Eternity and elegance.

Silestone Eternal Statuario

A bluey white surface with light and bright veins in grey and pink hues. A statement of colour and harmony.

Silestone Pearl Jasmine

Jasmine is a grey-veined white stone with an essence of extreme purity. Everlasting delicacy and strenght.



Silestone Eternal Serena

An earthy background with grey and green hues, slightly veined in pure white.

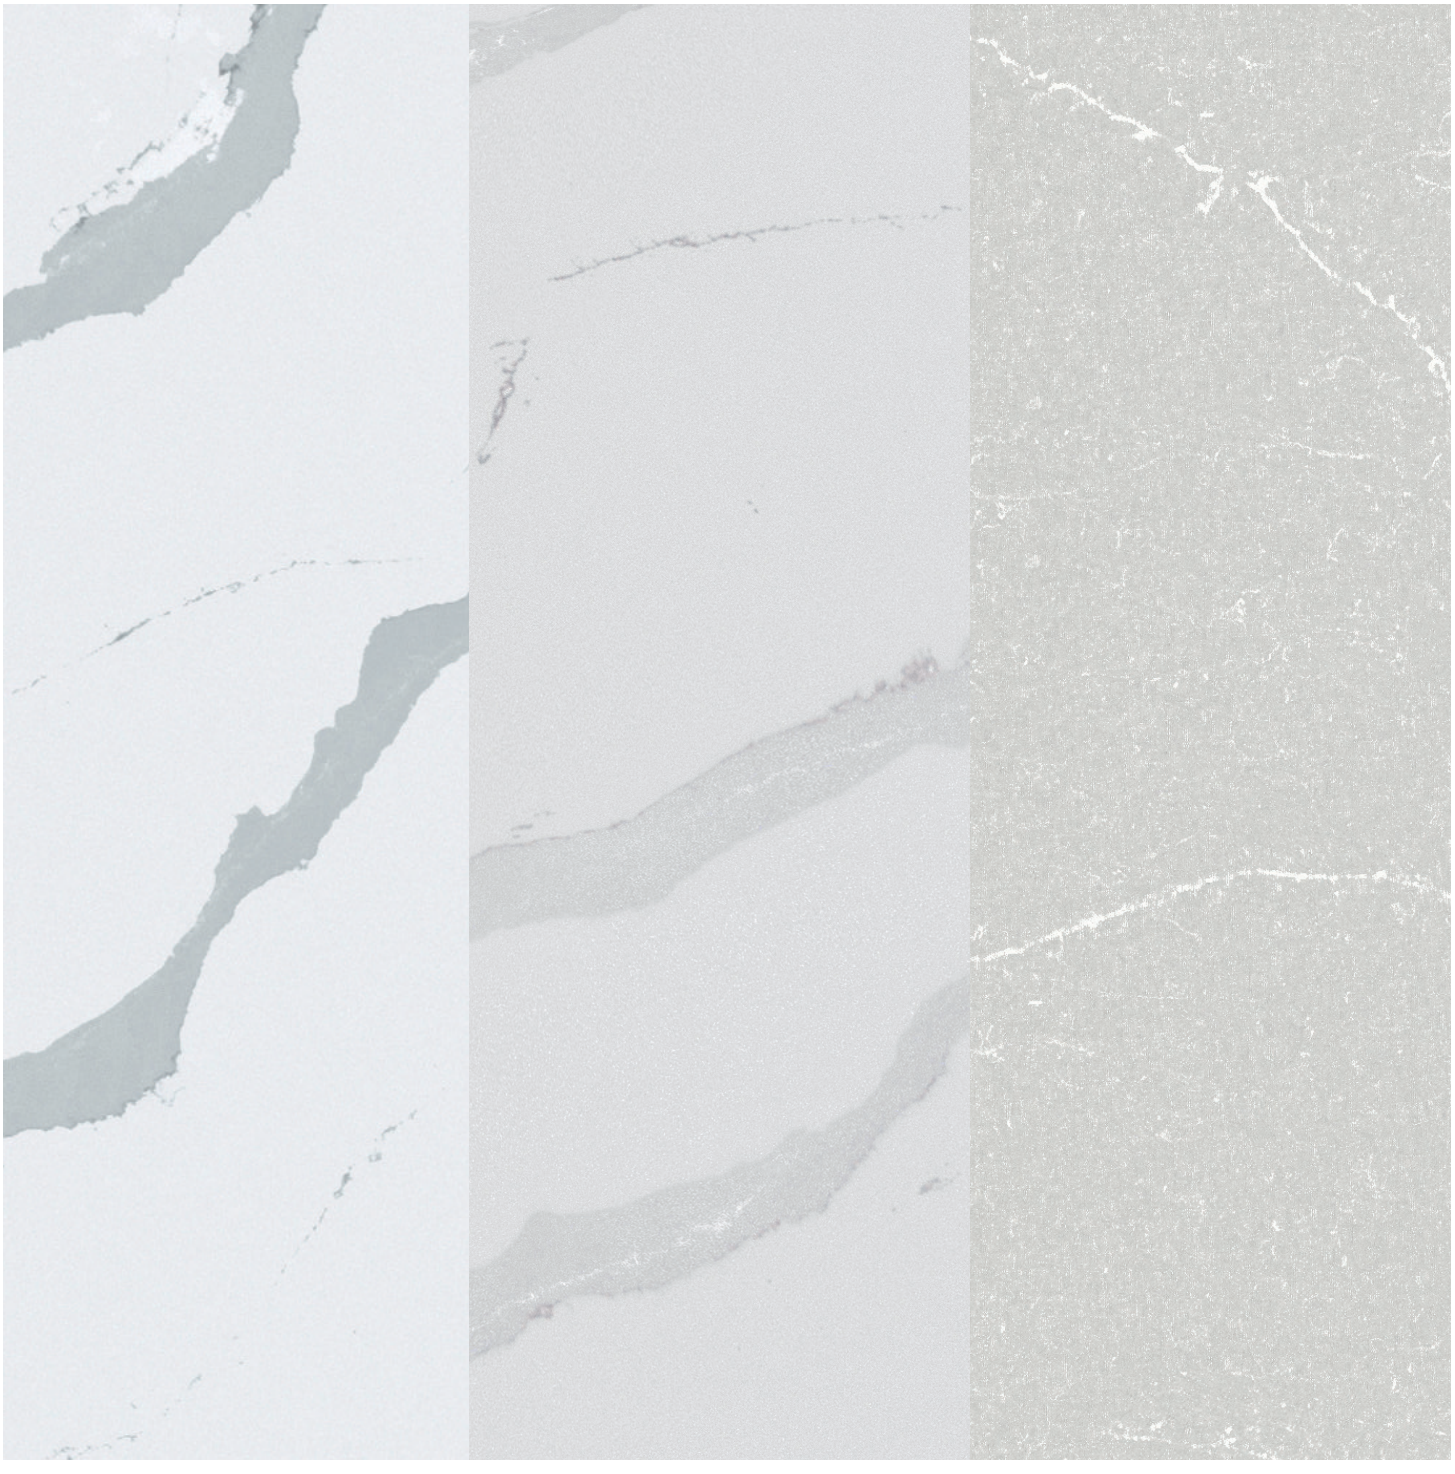
The sand finisjh of Serena evokes both softness and light.

Silestone Charcoal Soapstone

Greenish grey background with powerfull white veins.

Silestone Eternal Marquina

With a deep black base and bright white veins, “Marquina” is one of the most exclusive and beautiful marbles found in nature.



Silestone Bianco Calacatta

Combines electric thick veins with a luminous background. The new Bianco Calacatta has the most character from the entire collection. Contrast and personality that will enchance to any space that it touches. It brings a dramatic effect to either a classic or contemporary tasted.

Silestone Classic Calacatta

An elegant and subtle reinterpretation of the desirable Calacatta. It stands out for its uniform grayish veins that cross the neutral background with a translucent appearance. The Classic Calacatta evokes nature thanks to its great resemblance to real stone.

Silestone Desert Silver

Evokes an icy surface patterned with fine and clear veins. It offers a very balanced and uniform translucent design. Inspired by the classic and long-lasting marble trend, it stands out for its easy combination with any type of material or architectural element.

BIANCO CALACATTA

ETERNAL EMPERADOR

SILESTONE®

Silestone Eternal Marfil

Soft copper veined on cream background. Warm and minimalist. The Eternal Marfil is a new reinterpretation of Crema Marfil marble, a neutral colour that brings naturalness and serenity to any space. It is sure to bring long lasting beauty with its unique details.

Silestone Eternal Emperador

Emperador stands out for its creamy streaks and bright touches scattered on an earthy brown background. Natural tones very in line with the trend of marble and warmer environments. Tradition and elegance that reinvents itself with a touch of sumptuousness. Make a bold statement.

AKEMI®

MARBLE- AND STONE CARE

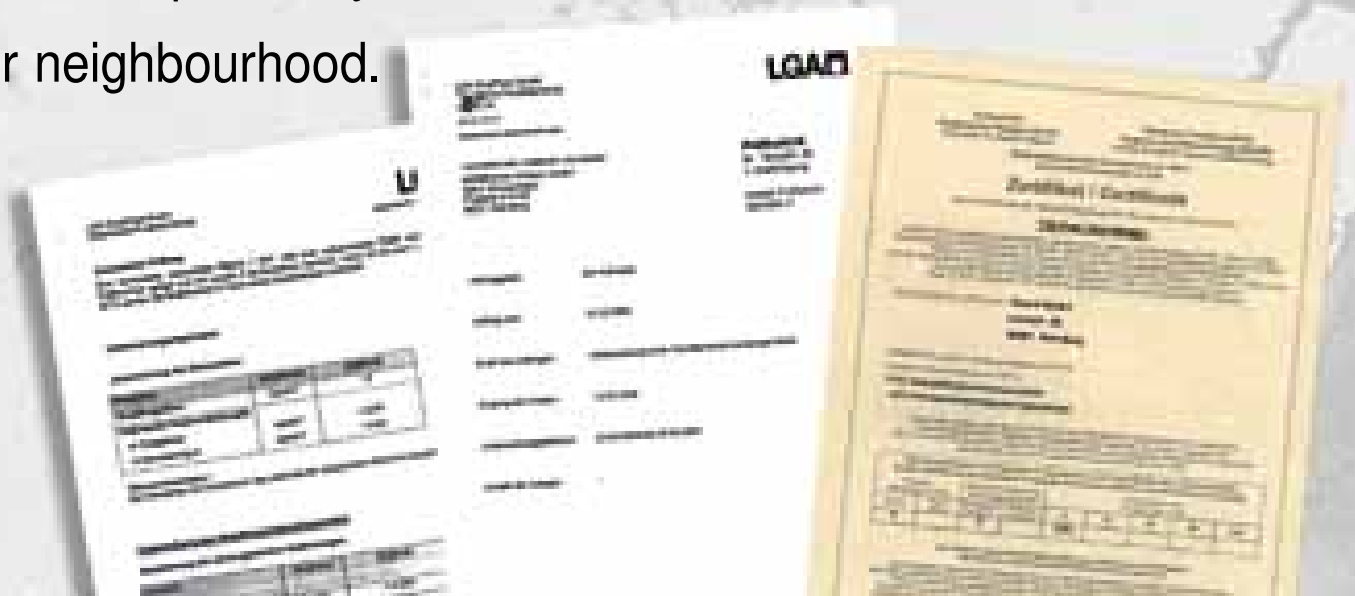
AKEMI®

AKEMI® - TRADITIONAL PARTNER OF NATURAL STONE PROFESSIONALS

AKEMI has been producing chemical products for the treatment of artificial and natural stones for more than 75 years. On account of these decades of experience, AKEMI is the leading partner world-wide for stone-processing enterprises.

By means of intensive research and development, our comprehensive range of products is continually being improved and extended. The very high quality level of AKEMI's products is ensured by up-to-date production and filling plants as well as continual inspection and testing.

Your high-quality natural stone deserves being treated with our professional products. AKEMI's products for cleaning, protection and care of natural stones are available from dealers specialized in tiles, building material and natural stones. We would be pleased to provide you with information about AKEMI dealers in your neighbourhood.



FOODSAFE

MANY AKEMI PRODUCTS HAVE BEEN CERTIFIED BY EXTERNAL GERMAN TESTING LABORATORIES. THESE ATTEST IN PARTICULAR TO THE COMPATIBILITY OF MANY OF THE IMPREGNATING AGENTS AND CLEANERS WITH FOODSTUFFS OR ARE CONNECTED WITH THE LISTING AND REGISTRATION OF OUR DISINFECTANTS.

AKEMI®

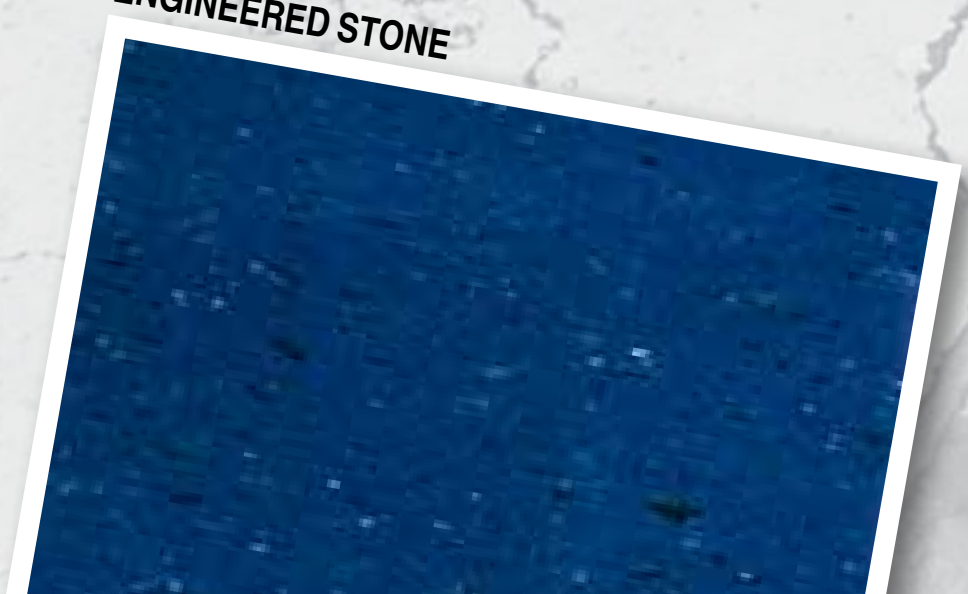
SHORT STONE GUIDE

NATURAL STONE

In the case of natural stone, a distinction must be made between hard and soft rock. The hard types of rock include granite, gneiss, quartzite and porphyry. The soft types of rock include sandstone as well as limestone, e.g. marble (Thassos, Carrara, Estremoz, Palisandro etc.), Jurassic marble, Solnhofer stone, travertine, Botticino and Trani.

ARTIFICIAL STONE / ENGINEERED STONE

Artificial stone consists of pieces of natural stone which are bound together by means of synthetic resin or cement. Examples of cement-bound artificial stone are concrete ashlar or terrazzo. Examples of resin-bound artificial stone are agglomerate marble or quartz-based surfaces (Engineered Stone). AKEMI has developed a special care programme (Quartz Care) for Engineered Stone. Please ask for a specific brochure.



SENSITIVITY TO ACIDS

Particular kinds of natural stone consist mainly of calcium carbonate and are called limestone. Limestone, for example marble, is sensitive to acids! Cement-bound artificial stones, such as concrete ashlar, are also acid-sensitive. This is the reason why wine or fruit juice must be removed from the stone surface immediately. We strongly advise you to avoid using acidic cleaning agents for these kinds of stone.

Acid stain on marble.

AKEMI®

TREATMENT OF STONE FLOORING

■ INITIAL- AND BASIC CLEANING

A thorough cleaning with **AKEMI STONE CLEANER [1]** should be made prior to the protective treatment. Stone Cleaner has extremely intensive cleaning properties. It removes slight cement films, layers of stone care products, oil and grease, soot, tar and residues of synthetic paint as well as plaster.

■ PROTECTIVE TREATMENT

Most natural and artificial stones are sensitive to stains and for this reason they need a special kind of protection. **AKEMI STAIN REPELLENT SUPER [10]** (on some stones slight colour enhancement) and **AKEMI STAIN REPELLENT NANO-EFFECT [11]** (no colour enhancement) provide a preventive basic protection for your rough, ground or polished natural and artificial stone.

STAIN REPELLENT NANO-EFFECT
Protects natural stone very quickly and durably against stains.

In case you prefer the application of a product emulsified in water, we recommend **AKEMI STAIN REPELLENT W [9]** (on some stones slight colour enhancement). The treated stones are protected against stains caused by water, grease and oil. Yet, should stains do appear, these can be removed considerably easier. The treated surfaces retain their ability to breathe and it is easier to care for the stone surface. In places which are particularly exposed, the protective treatment should be renewed once a year after a basic cleaning.

STONE CLEANER
For the intensive cleaning of stone surfaces with heavy dirt.

TREATMENT OF STONE FLOORING

■ REGULAR CLEANING AND CARE

AKEMI CRYSTAL CLEAN (concentrate) [3] is used diluted for the daily removal of slight dirtying on all polished natural and artificial stones, fine stoneware and ceramics. Due to its balanced formulation, Crystal Clean dries fast and free of streaks. **AKEMI MILD STONE SOAP [2]** is a mild cleaning agent of all rough natural and artificial stone flooring. Even if it is regularly used, the structure and colour of the stone remains unchanged. Additionally, Mild Stone Soap contains high-quality care components.

■ NEW FINISHES

After a basic cleaning, dull and worn stone flooring should be polished up with the help of **AKEMI STONE POLISH WAX-BASED [15]** (slight colour enhancement) or **AKEMI POLISHING FLUID NO. 10-2012 [14]** (strong colour enhancement). Afterwards,

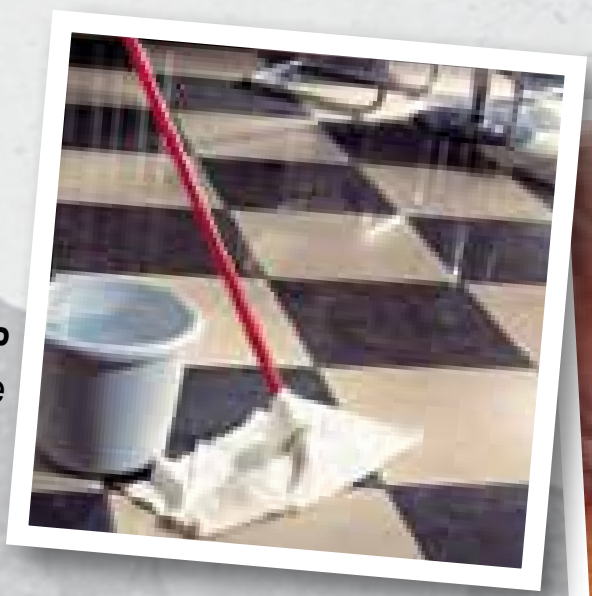
CRYSTAL CLEAN (CONCENTRATE)
For the daily cleaning
of polished stone flooring.

the surfaces will shine as though they were new. We recommend you use a polishing machine.

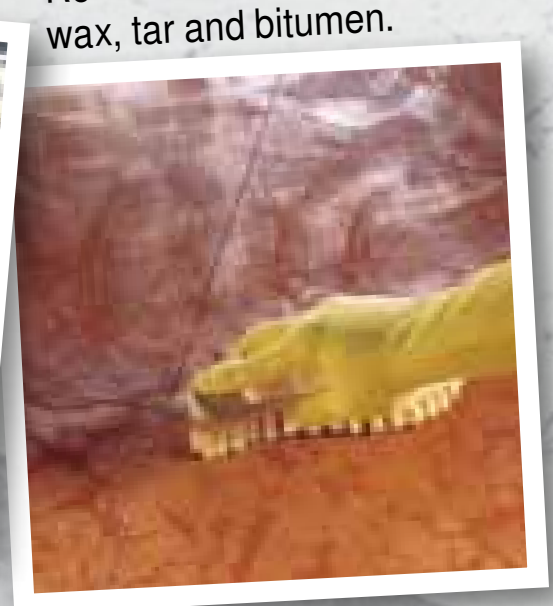
■ SPECIAL CLEANING

AKEMI WAX STRIPER [5] is the proper product if you want to remove wax stains from your stone flooring. It is also excellently suited to remove tar and bitumen. If there are oil or grease stains on your stone flooring, we recommend to use **AKEMI OIL- AND GREASE REMOVER PASTE [8]**. For a good cleaning success it is necessary to use the product immediately.

MILD STONE SOAP
For the daily cleaning of rough stone flooring



WAX STRIPPER
Removes stubborn layers of wax, tar and bitumen.



AKEMI®

TREATMENT OF TABLETOPS, KITCHEN COUNTER TOPS AND WINDOW SILLS

■ BASIC CLEANING

Use **AKEMI STONE CLEANER [1]** for the basic cleaning of table tops, kitchen counter tops and window sills made of natural and artificial stone.

■ PROTECTIVE TREATMENT

Table tops and kitchen counter tops regularly get in contact with oil and grease. You should therefore protect your stone with **AKEMI STAIN REPELLENT SUPER [10]** (slight colour enhancement on some stones) or **AKEMI STAIN REPELLENT NANO-EFFECT [11]** (no colour enhancement). As the AKEMI

STAIN REPELLENT NANO-EFFECT
Protects natural stone quickly and durably against stains.

CRYSTAL CLEAN SPRAY
For the daily cleaning of slight dirtying.

Stain Repellent products have a water-repellent effect, they should also be used for the treatment of window sills. These are exposed not only to rain sometimes but also to spilt water from the watering can.

■ REGULAR CLEANING AND CARE

AKEMI CRYSTAL CLEAN [3] (pump spray ready-to-use) is used for the daily removal of slight dirtying on all natural and artificial stones, fine stoneware and ceramics. Due to its balanced formulation, Crystal Clean dries fast and free of streaks. **AKEMI TRIPLE EFFECT [17]** is used for the occasional care impregnation. In one single operation three effects are achieved: cleaning, protection and care. Triple Effect

STONE POLISH SILICONE-BASED
For polishing of window sills, table and kitchen tops.

TREATMENT OF TABLETOPS, KITCHEN COUNTER TOPS AND WINDOW SILLS

freshens up the basic impregnation and restores the lustre of the stone. In case the table or kitchen top should be polished once a year to high gloss, we recommend to use **AKEMI STONE POLISH SILICONE-BASED [16]**. This polish additionally preserves the natural colour and makes the surface easy to care.

■ OIL AND GREASE STAINS

Oil and grease stains in the kitchen and on the dinning table can be removed with **AKEMI Oil and Grease Remover Paste [8]**.

STONE CLEANER
For the intensive cleaning of stone surfaces with heavy dirt.

OIL AND GREASE REMOVER PASTE
Thoroughly removes oil, grease and wax stains.

For a good cleaning success it is necessary to immediately treat the stain.

■ FOOD SAFETY

The **AKEMI STAIN REPELLENT products, AKEMI CRYSTAL CLEAN, AKEMI TRIPLE EFFECT, AKEMI STONE CLEANER** and **AKEMI STONE POLISH SILICONE-BASED** are harmless to health upon contact with food products after hardening (certified by an external German testing institute).

■ CARE KITS

For the perfect care of your high-quality working top we recommend the **AKEMI Care Kit** (contains: Triple Effect, Oil and Grease Remover Paste, Stain Repellent Nano-Effect).

1 set in transparent clamshelf
Art.No. 1 09 66

Contains:
500 ml Triple Effect
250 ml Oil and Grease Remover Paste
250 ml Stain Repellent Nano-Effect

AKEMI®

TREATMENT OF STONE SURFACES IN SANITARY AREAS

■ PROTECTIVE TREATMENT

In order to ensure that your washstand as well as the floor and wall tiles of natural stone in your bathroom are protected and are easy to take care of, we recommend you to treat them with **AKEMI STAIN REPELLENT SUPER [10]** (on some stones slight colour enhancement) or **AKEMI STAIN REPELLENT NANO-EFFECT [11]** (no colour enhancement). Use of these products also makes the surface of the stone water-repellent which is an important factor on account of the high degree of moisture in the bathroom. Lime residues are no longer capable of adhering firmly to the stone and can therefore be easily wiped away from the surface. In addition, the Stain Repellent products and their oil- and grease repellent effect prevent creams, body lotions and other oily cosmetics from immediately penetrating into the stone.

■ REGULAR CLEANING AND CARE

AKEMI CRYSTAL CLEAN (ready-to-use pump spray) [3] is used for the daily removal of light dirtying on all natural and artificial stones, fine stoneware and ceramics. Due to its balanced formulation, Crystal Clean dries fast and free of streaks. In the bathroom we recommend the use of **AKEMI DISINFECTANT CLEANER [4]** for the cleaning of

deep staining on acid-resistant natural stones (such as granite and gneiss), as well as tiles, plastics, glass and high-grade steel. This product quickly removes stubborn lime residues, rust stains, soap residues and dirt. **AKEMI TRIPLE EFFECT [17]** is used for a periodical care impregnation. In one single operation three effects are achieved: cleaning, protection and care. Triple Effect therewith refreshes the lustre of the strongly used surfaces in bathrooms and restores the lustre of the stone. For the high gloss polish, we recommend to use **AKEMI STONE POLISH SILICONE-BASED [16].**

DISINFECTANT CLEANER
Quickly and durably removes lime and hard-water residues. Also removes soap residues and stubborn dirt in wet areas.

■ OIL AND GREASE STAINS

Oil and grease stains caused by cosmetic articles can be removed with **AKEMI OIL AND GREASE REMOVER PASTE [8]**. For a good cleaning success it is necessary to immediately treat the stain with Oil and Grease Remover Paste.

AKEMI®

TREATMENT OF TERRACES, GARDEN PATHS AND FEATURES MADE OF STONE

■ PROTECTIVE TREATMENT

Terraces and garden paths, garden benches and tables, statues, balustrades made of stone should be treated with **AKEMI STONE IMPREGNATION [12]**. This water-repellent impregnation is excellently suited for the use outdoors. The stone maintains its ability to breathe. In areas where an additional oil- and grease-repellent effect is required, like e.g. a barbecue area, a garage doorway or a parking position, **AKEMI STAIN REPELLENT SUPER [10]** (on some stones slight colour enhancement) or **AKEMI STAIN REPELLEN NANO-EFFECT [11]** (no colour enhancement) should be applied. **AKEMI COLOUR INTENSIFIER [13]** intensifies the natural structure and colour on rough, sawed or flamed stones. This weather-resistant impregnation produces a permanent wet-effect which also resists strong solar radiation. Neutral or colourless stone surfaces are revalued.

■ CLEANING

Terraces made of natural or artificial stone which have become dirty on account of air or rain-borne pollution should be cleaned from time to time with **AKEMI STONE CLEANER [1]**. If fat has dripped onto your terrace during a barbecue, we recommend you to use **AKEMI OIL AND GREASE REMOVER PASTE [8]**. For a good cleaning

ALGAE AND MOSS REMOVER LONGLIFE
Prevents regeneration of films caused by plants in the long run.

process it is necessary to immediately treat the stain with Oil and Grease Remover Paste. Unprotected enclosing walls and flagstones in the garden are continually being soiled by natural deposits. In addition, stone can be discoloured by blossoms, leaves and bird droppings. This dirt can be easily and quickly removed with **AKEMI ALGAE AND MOSS REMOVER POWER [6]**. **AKEMI ALGAE AND MOSS REMOVER LONGLIFE [7]** is – besides stone surfaces - excellently suited for wood, synthetic materials and roof tiles - ideal for spring-cleaning. **AKEMI ALGAE AND MOSS REMOVER LONGLIFE [7]** does not have though an immediate effect, yet it removes films caused by plants durably and prevents their regeneration in the long run.

OIL AND GREASE REMOVER PASTE
Removes oil and grease stains.

COLOUR INTENSIFIER
Intensifies colour and structure of the stone by means of a permanent wet-effect.

TREATMENT OF GRAVESTONES

■ PROTECTIVE TREATMENT

On account of the shade and the damp climate which many cemeteries have in common, gravestones are continually being soiled by natural deposits. A prophylactic water- and dirt-repellent treatment with **AKEMI STONE IMPREGNATION [12]** slows down this process. The stone maintains its ability to breathe.

■ CLEANING AND CARE

If natural deposits have already accumulated on a gravestone, they can be easily removed with **AKEMI ALGAE AND MOSS REMOVER POWER [6]**. The product also removes discolora-

STONE IMPREGNATION
Repels water and dirt.

tions caused by blossoms and leaves as well as bird droppings and other stubborn forms of dirt. We recommend you to use **AKEMI STONE POLISH SILICONE-BASED [16]** for the care of polished gravestones. This product preserves the natural colour of the stone and renews its lustre.

■ MONUMENT CARE KIT

For a simple application of our products we compiled a complete set of equipment (contains: Stone Cleaner, Stone Impregnation, Stone Polish silicone-based).

1 set in a portable case, Art.No. 1 09 02

Contents:
250 ml Stone Cleaner
250 ml Stone Impregnation
250 ml Stone Polish silicone-based
1 sponge, 1 cloth, 1 polishing cloth, 1 brush,
1 pair of gloves, 1 mixing cup

AKEMI®

STAIN GUIDE AND INDIVIDUALIZED STONE CARE RECOMMENDATION

Further precise information on the subject “removal of stains” is given in our stain guide which is available at your AKEMI Dealer or on our website **www.akemi.com.**

In addition you can issue and print your own individualized **stone care recommendation** for more than 10.000 natural and artificial stones on our homepage **www.akemi.com.** These recommendations do not only take account of the type of stone but also of its composition (e.g. ground or polished) and field of application (e.g. kitchen working tops or bathroom).

[1)] 

After hardening the product is harmless to health upon contact with food products (certified by an external German testing institute).

1 **Stone Cleaner**
For the intensive cleaning of deeply soiled stone surfaces. Foodsafe [1]).

2 **Mild Stone Soap**
For the regular cleaning and care (on rough stone).

3 **Crystal Clean**
For the daily cleaning of light dirtying (on polished stone). Dries quickly without leaving streaks. Foodsafe [1]).

4 **Disinfectant Cleaner** ★
Quickly and durably removes residues of lime and hard-water. Removes soap residues and stubborn dirt in wet areas.

5 **Wax Stripper**
Removes stubborn layers of wax as well as tar and bitumen.

6 **Algae and Moss Remover POWER**
Removes natural deposits from stone surfaces outdoors (terraces, enclosing walls, flagstones, gravestones etc.).

7 **Algae and Moss Remover LONGLIFE**
Prevents the regeneration of dirt caused by plants in the long run.

8 **Oil and Grease Remover Paste**
Thoroughly removes stains caused by oil, grease and wax.

9 **Stain Repellent W** ★
Protects natural stones against stains. Oil-, grease- and water-repellent. Emulsified in water, odourless. Foodsafe [1]). Causes colour enhancement on some stones.

10 **Stain Repellent Super**
Durably protects natural stone against stains. Oil-, grease- and water-repellent. Foodsafe [1]). Causes colour enhancement on some stones.

11 **Stain Repellent Nano-Effect**
Quickly and durably protects natural stone against stains. Oil-, grease- and water-repellent. Foodsafe [1]). No colour enhancement.

12 **Stone Impregnation**
Repels water and dirt.

13 **Colour Intensifier**
Intensifies colour and structure of the stone by means of a permanent wet-effect. Water- and dirt-repellent. Foodsafe [1]).

14 **Polishing Fluid No. 10-2012**
Polishing fluid, fast drying, brings shine on worn stone flooring. Use of a polishing machine is recommended.

15 **Stone Polish wax-based**
For the regular care of smooth stone flooring. Environmentally-friendly.

16 **Stone Polish silicone-based**
For polishing window sills, tables, kitchen working tops and gravestones. Cleans and cares in one single operation. Foodsafe [1]).

17 **Triple Effect**
Cleans, protects and cares in one single operation. Foodsafe [1]).
